Overnight Care Program

Sleep easy.

They'll be well cared for.

AMCS Overnight Care Program includes:

- Maintenance of the intravenous catheter placed by your veterinarian
- Continuation of intravenous fluid therapy provided by your veterinarian
- Administration of prescribed oral medications dispensed by your veterinarian (Does not include injectable medications)
- Monitoring of your pet's vital signs
- Medical observation of your pet including walks and feedings

AMCS Overnight Care Transfer Process:

- ONLY veterinarians enrolled in the Overnight Care Program can transfer your pet to AMCS
- AMCS will only accept stable post-op patients and stable medical patients at the AMCS's veterinarian's discretion
- Your pet's medical records must be faxed, along with a transfer call from your veterinarian to AMCS prior to your pet's arrival

When you arrive at AMCS:

- Your pet will be triaged by an AMCS nurse
- Your pet will be examined by an AMCS veterinarian. Patients with more serious needs will be seen first
- An AMCS nurse will assess oral medications provided, ensure patency of the IV catheter and supplies transferred with your pet
- An AMCS veterinarian will go over a treatment plan with you
- You will be asked to sign a treatment plan, designate a CPR status, and pay overnight care plan fee of $250.00

Overnight Care Plan hours are 5pm to 9 am. (There will be an additional fee for pets picked up after 9 am)

An AMCS Doctor will assess your pet to see if it qualifies for this program. Should your pet not qualify, it will be admitted into the emergency room (applicable fees will be charged accordingly).

If your pet becomes unstable overnight, we will make every attempt to contact you, but if we're unable to reach you, we have authority to intervene with emergency services deemed necessary by our doctors.

I have read, and understand the information provided on the left side of this page.
